

Web Development II CIS233

Assign #1 15 points

Content and Images

To complete this assignment you will need to copy the *presidents* folder from:

S:\Faculty\Elam\presidents

To:

H:\cis233

The presidents folder contains a doc file called **presidential_anecdotes.doc**

Within the presidents folder is a subfolder called **images** that contains the following images:

washington.jpg

jefferson.jpg

lincoln.jpg

kennedy.jpg

flag.jpg

You can also obtain these files from www.jimelam.com

Note: you may use 4 different images and text content if you wish, provided your page resembles the example shown on the next page.

Step 1

Create a Site definition called presidents for this assignment.

Set the default folder to H:\cis233\presidents

Set the default images folder to H:\cis233\presidents\images

Create the Page Shown on the Next Page

The screenshot shows a web page with a header and four content sections. The header has a grey background with an American flag on the left and the title 'Presidential Anecdotes' in the center. The first section is for George Washington (1789-1797), featuring a paragraph of text and a portrait of Washington on the right. The second section is for Abraham Lincoln (1861-1865), featuring a portrait of Lincoln on the left and a paragraph of text on the right. The third section is for Thomas Jefferson (1801-1809), featuring a paragraph of text on the left and a portrait of Jefferson on the right. The fourth section is for John F. Kennedy (1961-1963), featuring a portrait of Kennedy on the left and a paragraph of text on the right. Callout boxes with lines pointing to these elements identify the following HTML tags: 'h1' for the title, 'p' for the paragraphs, 'img' for the portraits, 'h2' for the section headers, and 'hr' for the horizontal lines separating the sections.

h1

p
(used 4 times)

img
(used 4 times)

h2

hr
(horizontal rule)

Guidelines

- Name the page **index.html**
- Set the Title to **your first and last name followed by a dash and then Assignment 1**, for example:
Jim Elam – Assignment 1
- Create a *Group Style* which sets all four margins and padding to 0 for the following tags: **h1**, **h2**, and **p**.
- Create a CSS tag style for each of the following: body, h1, h2, and p. Select your own formatting options (e.g. font, font-size (use percentages), color, background-color or image, margins). Make the page professional looking and easy to read, for example use whitespace for separation.
- Create a tag style for the **img** tag. Place a border and padding on each image, float the images to the left.
- Create a class style that will float images to the right. Apply this class to *two* of the four images.

Submit

A printout of the code for **presidents.html**
